

KAGITALA SAMEER

Data Engineer — AWS — ETL Pipelines — PySpark

sameerkagitala@gmail.com (+91) 7893165728
github.com/shaiksameersameer linkedin.com/in/sameerkagitala

Professional Summary

Data Engineer with hands-on experience in AWS, ETL Pipelines, PySpark, Apache Airflow, and SQL through internship and real-world projects. Experienced in building scalable data pipelines, processing large datasets, automating workflows, and developing cloud-based data solutions. Passionate about transforming raw data into actionable business insights and building reliable data-driven systems.

Technical Skills

Programming: Python (Pandas, NumPy), SQL

Data Engineering: ETL Pipelines, PySpark, Apache Airflow, Data Validation, Batch Processing, Data Modeling

AWS Cloud: S3, Glue, Redshift, Lambda, EC2, IAM, CloudWatch

Databases: MySQL, PostgreSQL, Amazon Redshift

Core Skills: Data Analysis, Reporting, Workflow Automation, Team Collaboration, Problem Solving

Experience

AWS Data Engineer Intern — Conavlytics

Dec 2025 – Jun 2026

- Built and maintained ETL pipelines using Amazon S3, AWS Glue, and Redshift for structured data processing and analytics workflows
- Processed and transformed 100k+ records into analytics-ready datasets for reporting and business insights
- Automated ETL workflows and data validation tasks using Apache Airflow, improving pipeline reliability and reducing manual effort
- Applied AWS best practices including IAM security, scalable architecture, monitoring, and workflow automation using CloudWatch

Projects

AWS ETL Pipeline — Glue, Redshift, Airflow

github.com/shaiksameersameer/aws-etl-glue-redshift-quicksight

- Built an end-to-end ETL pipeline processing 100k+ records from S3 to AWS Glue and Redshift
- Orchestrated automated workflows using Apache Airflow with scheduling, retries, and monitoring
- Optimized PySpark transformations and Redshift schema design, improving query performance by 30%

YouTube Analytics Pipeline — PySpark, S3, Airflow

github.com/shaiksameersameer/youtube-etl-pipeline

- Developed a PySpark analytics pipeline to process and analyze YouTube engagement datasets
- Automated ingestion and transformation workflows using Apache Airflow DAGs for batch data processing
- Stored curated datasets in Amazon S3 for scalable analytics and reporting workflows

Education

Parul University, Vadodara

B.Tech in Computer Science (Artificial Intelligence)

2021 – 2025

Certifications

Python (HackerRank) — SQL (HackerRank)
